EXPERIENCE

FloData Analytics

New Delhi

Full Stack Developer

Sep 2024 – Present

- Built 3 full-stack modules using React and Flask, serving 1,000+ internal users
- Collaborated with US clients on requirements gathering, solution design, and feature deployment
- Enhanced UI/UX across modules, improving usability and visual consistency
- Recognized as Employee of the Month (June 2025) for delivery excellence and UI/backend coordination
- Integrated frontend-backend for 15+ features, cutting deployment time by 20%
- Architected RESTful APIs with Flask, PostgreSQL, JWT auth, and role-based access control

Haeywa

Gurgaon, Haryana

Software Developer

Oct 2023 – July 2024

- Designed secure dashboard authentication using Python, Kafka, & Cassandra, supporting 10K+ concurrent users
- Developed push notification system using Python, FCM, and Django
- Built automated icon generation using Python (Boto3) and AWS S3, reducing manual effort by 15 hrs/week

iHUB Divya Sampark at IIT Roorkee

Remote

Data Science Intern

June 2023 – Aug 2023

- Built "Bengaluru Estate Prediction Model" using Python (pandas, NumPy, scikit-learn) achieving 85% accuracy
- Cleaned 10K+ real estate records with feature engineering, missing value, & outlier handling
- Created interactive dashboards using JavaScript and Chart.js to present ML insights to stakeholders

PROJECTS

Inventory & Order Management System | FastAPI, React, PostgreSQL, Docker, Docker Compose

- Production-ready full-stack application with product CRUD (SKU uniqueness, stock validation), customer management (unique email), and order creation with inventory checks, stock deduction, and auto-calculation
- Built responsive dashboard with product/customer/order metrics, low-stock alerts, and professional React UI with form validation and toast notifications
- Containerized with Docker Compose using FastAPI REST APIs, Pydantic models, async endpoints, PostgreSQL with SQLAlchemy ORM, and transaction management with rollback on failures [GitHub]

Bike-pool (Ride-sharing) | Python, Flask, React, TypeScript, REST APIs

- Backend with OTP-based phone verification and REST APIs for ride matching
- React frontend with hooks (useState/useEffect) for state management
- Google Maps-style navigation with Python backend for real-time tracking [GitHub]

Payment Processing Dashboard | Flask, Redis, Celery, Docker

- Built fault-tolerant payment gateway with Redis-cached Luhn validation (80% latency reduction) and Celery async processing with exponential backoff retries
- Implemented real-time WebSocket dashboard with JWT auth, rate limiting, and multi-state payment handling (success/failure/pending)
- Containerized with Docker with 95% test coverage and fault-tolerant architecture [GitHub]

EDUCATION

DRONACHARYA COLLEGE OF ENGINEERING

Gurgaon, Haryana

B.Tech in Computer Science & Engineering

April 2020 – May 2024

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL

Frontend: React.js, HTML5, CSS, Bootstrap, jQuery

Backend: Django, Flask, Django REST Framework, FastAPI

Databases: MySQL, PostgreSQL, Cassandra

Cloud & DevOps: AWS (Boto3, EC2, S3), Docker, Git, GitHub, Kafka

Testing: Unit Testing, Integration Testing

Tools & Methodologies: Linux, REST APIs, JWT, Agile, Jira, Microsoft Office
